

Fast Chargers are *gaining speed*

Become an FPL EVolution fast charging host

Our fast charging network is designed to make it easier for Floridians to drive electric. With more than 60 stations already installed throughout the state, FPL is giving electric vehicle drivers more range confidence, while helping promote EV adoption.

FPL has a plan to expand its fast charging network into urban areas by partnering with leading organizations like yours to increase access to fast chargers in metropolitan areas.

Benefits

- » Attract new customers
- » FPL manages the construction, operation and maintenance of fast charging equipment at your location
- » Efficient and professional installation by a dedicated team of installers
- » Provides charging opportunities to city dwellers
- » Reinforce commitment to sustainability

FPL provides installation and maintenance

- » FPL will provide the charging equipment and manage the construction and maintenance.
- » No net impact on electricity costs.

Looking for partners

FPL is looking for partners in urban areas that can dedicate four parking spaces for a 10 year commitment.

Are you ready to be part of the FPL EVolution fast charging expansion?
